EDUCATION

Barnard College, Columbia University — New York, NY
Bachelor of Arts in Computer Science; Minor in English. Dean's List — 6 of 6 completed semesters. — *Expected May 2027*

SKILLS

AI & Data: LLM APIs, Retrieval-augmented generation (RAG), Pandas, NumPy, Matplotlib
Frameworks & Databases: React, Next.js, FastAPI, PostgreSQL, Redis, SQLite, Supabase
Languages: Python, JavaScript, TypeScript, Java, C++, SQL, HTML/CSS
Infrastructure: AWS EC2, Docker, Git, Linux

EXPERIENCE

CTO and Technical Co-Founder (previously Junior Developer) — April 2026 – Present
Lynxster — *New York City, NY*

- Built the initial software foundations and cryptographic core components for a legal tech service addressing document provenance and pre-disclosure confidentiality.
- Defined system architecture, implementation plans, and programming guides to direct phased product development.
- Built a Next.js/SQLite patent-review application with document previews, embedding-based retrieval, and Claude-powered chat.
- Drafted the first complete patent application, establishing the basis for subsequent team review and revisions.

Behavioral Research Volunteer and Co-Author, Chaeteessa — October 2026 – Present
American Museum of Natural History, Invertebrate Zoology — Jessica Ware's Lab — *New York, NY*

- Contribute to Chaeteessa feeding-behavior study planning; data processing and analysis are scheduled for 2027.
- Provide mantis care and collect behavioral data through feeding and mating trials, observations, and video recordings.
- Independently build filming enclosures from scratch, incorporating removable perch mounts and wooden supports.

Collections Digitization Volunteer, DIODE — September 2026 – Present
American Museum of Natural History, Invertebrate Zoology — Jessica Ware's Lab — *New York, NY*

- Prepare and label dragonfly specimens for imaging, arranging detached fragments and rehousing specimens afterward.
- Operate camera and motorized imaging equipment; review images for focus, framing, and identifier consistency.

Software Engineer, Frontend, Admin, and Prompt Engineering — September 2025 – May 2026
Crackd.ai — *Columbia University, NY*

- Built React/Supabase interfaces for image uploads, caption generation, and content moderation connected to live user data.
- Integrated existing APIs and extended LLM chains to pass intermediate outputs and retrieve cultural context from Supabase.
- Implemented embedding-based caption ranking and added contextual examples and self-critique steps to generation prompts.

Full Stack Software Development Intern — May 2025 – May 2026
Buzzworks — *Mumbai, India*

- Built and deployed a WhatsApp HR chatbot as the sole developer, integrating FastAPI, Meta's Cloud API, existing HR services.
- Implemented onboarding, OTP verification, document collection, offer-letter, and employee-request workflows.
- Built Redis-backed session state supporting 10K+ sessions at sub-200ms p95 latency; deployed with Docker on AWS EC2.

Research Assistant, Computer Science — May 2025 – September 2025
Ted Rogers School of Management, Toronto Metropolitan University — *Toronto, Canada*

- Built a Python citation-conversion pipeline for 800+ legal footnotes, achieving 92% accuracy and 30% fewer review cycles.
- Developed multistage parsing to resolve Id., Ibid., and Supra references, including nested citation dependencies.
- Implemented DOCX XML citation insertion, parallel processing, and unit tests while preserving manuscript structure.

Conservation Intern — June 2024 – August 2024
GVI, Karongwe Private Game Reserve — *Limpopo, South Africa*

- Tracked wildlife and recorded behavioral observations; conducted camera-trap, vegetation, bird, and prey surveys.
- Led a seven-person bush-clearing team, preparing risk assessments and coordinating equipment and safety briefings.
- Taught preschool and middle-school students in a nearby village through community sessions every two weeks.

TEACHING & MENTORSHIP

Mentor — January 2024 – May 2026
Application Development Initiative (ADI), Columbia University — *New York, NY*

- Mentored six students across Spring and Fall 2026 cohorts, providing individual guidance on academics, projects, and recruiting.

Teaching Assistant & Instructor — January 2024 – December 2024
Emerging Scholars Program, Columbia University — *New York, NY*

- Taught weekly sessions introducing 15 students to algorithms, computer vision, and UI/UX design across Spring and Fall 2024.
- Adapted lesson materials and led collaborative activities, connecting concepts with further coursework and opportunities.
